DAF CISO's Blue Cyber Line-Up

- *Sept 6 **“Can I give my Contractor CUI? and Protecting common types of CUI.”** Blue Cyber Director Kelley Kiernan will take you through the world of Controlled Unclassified Information, which is a type of data in all federal agencies and answer your questions. Understand how to adequately protect CUI and how to identify Controlled Unclassified Information.
- *Sept 13 **“Zero Trust Steps for Small Business”** Learn about Zero Trust and how it is built-in to NIST SP 800-171. Walk away understanding Zero Trust and how you can implement Zero Trust Steps in your small business
- *Sept 20 **“A slow walk through of the proposed CMMC Level 1 and the FAR 52-204-21 Basic Cyber Hygiene”** (hint: they are the same) A special 2-hour Session of Blue Cyber. The Blue Cyber Director, Kelley Kiernan and technical experts will cover the 15 security requirements in the proposed CMMC Level 1 and FAR 52.204-21, which comprise basic cyber hygiene for your small business.
- *Sept 22-23 **“A Walk Through of the NIST SP 800-171 and Proposed CMMC Level 2”** 11am - 3pm EDT, both days. Join hundreds of your friends, technical experts and the Blue Cyber Director, Kelley Kiernan will cover the 110 security requirements in the proposed CMMC Level 2 and NIST SP 800-171, which comprise comprehensive cyber hygiene and intellectual property protection for your small business. We will talk about what is gained by implementing NIST SP 800-171, which is a component of the DFARS 7012, which has been in every small business contract since 2016! We will talk about what they mean, how to achieve them, how to evaluate your compliance and how to document your compliance. Join us at 11:00am Eastern each day for six hour of fun (yes, we will make it fun)! More information from Kelley.Kiernan@us.af.mil Space is limited to 500. Register on the Blue Cyber webpage.
- *Sept 27 **“Where did these chips come from? - Cyber Supply Chain Risk Management”** The Blue Cyber Director, Kelley Kiernan will answer your cybersecurity questions and discuss the methods for understanding risk involved in the life-cycle of your IT and software being supplied to the government.
